PROJECTS

Dissertation: The Aspirational Districts Programme and Governance Transformation in India

- Conducted a qualitative research study on the Aspirational Districts Programme (ADP) to examine its impact on bureaucratic leadership, decentralised governance, and centre-state relations. Using policy analysis, thematic content analysis, and process tracing, the research found that while the ADP improves administrative accountability and development outcomes through data-driven performance monitoring, it also creates tensions between decentralisation and centralised evaluative control.

SKILLS

- Critical Thinking
- Academic Writing
- Public Speaking & Presentation
- Time Management & Organization
- Multilingual Communication
